The German-Namibian collaborative project "PROCEED" examines options for using off-grid hybrid energy systems to establish an efficient and sustainable power supply in Namibia that is ...

In a sparsely populated country like Namibia, decentralised energy solutions will be much faster and less expensive to deploy than the grid, allowing people living in hard-to-reach ...

The government is set to launch a new off-grid electrification programme aimed at bringing power to remote communities that are too far from the national grid.

HOPSOL Africa is a technology leader for on- and off-grid solar power plants, fuel save controllers as well as solar diesel hybrid systems at utility scale (e.g. mining solutions).

The study is limited to off-grid configurations for an informal settlement in Namibia and assesses whether electrification from a centralized microgrid or stand-alone solar home ...

The ECB has advised the ministry to approve the facilities, which include a mix of diesel and solar photovoltaic generation intended for own consumption, off-grid use and mining supply.
