---

“This year, 81% of all new capacity on our national grid is going to be solar and storage. And these two technologies go hand in hand, sort of like chocolate and peanut ...

A new, floating pumped hydropower system aims to cut the cost of utility-scale energy storage for wind and solar farms.

The geniuses who are planning New York's energy future think that they can make intermittent wind and solar generators work to power the electrical grid by the simple device of ...

The need to harness that energy - primarily wind and solar - has never been greater. Batteries can provide highly sustainable wind and solar energy storage for ...

Solar and wind power are planned to develop in tandem with battery storage so excess energy can be saved while nature provides wind or sun. Battery storage is meant to ...

The economic value of energy storage is closely tied to other major trends impacting today's power system, most notably the increasing penetration of wind and solar ...
