Who makes ClearVue glass in New Zealand?

ClearVue has officially entered the New Zealand market through a landmark Manufacturing and Distribution Agreement with Viridian Glass Limited Partnership.

Does Viridian manufacture ClearVue solar glazing?

The ASX listed company has struck a five-year manufacturing and distribution agreement that will enable Viridian to exclusively manufacture the range of ClearVue smart solar glazing products. Viridian will also pick up distribution rights for the products within the island nation.

Why is ClearVue expanding into the NZ market?

The expansion into the NZ market strengthens the company's push into the Asia Pacific region and will meet the growing demand for energy-efficient building materials. While ClearVue is developing a range of building products, its core innovation is to turn window glass into a solar generating panel.

What is a curtainwall?

Since 1985 Thermosash Commercial Limited has developed a totally integrated highrise, performance, unitised panelwall (curtainwall) suite to enable all the product aesthetic features to be used on one project. These products can also be used on lowrise applications where large spans or large panes of glass require a higher strength system.

ClearVue Technologies has appointed leading New Zealand glass manufacturer Viridian Glass, to continue the company's solar glass sales push into the Asia Pacific region.
