Here are a few clever modified container energy storage solutions we're keeping our eyes on, as well as a few we've already built out for our customers in the energy industry.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

The project will contribute to the Government of Niue's target of 80% renewable. The project will be completed mid-2026 when the Government of Niue under the Department of Utilities and ...

Through the addition of an EMS,BESS and more solar to the network Niue can often operate without any diesel generators running for up to 10 hours at a time - on average the generators ...

"The new generation will result in an annual reduction of up to 753,000 litres of diesel and remove over 52,000 tonnes of CO₂e emissions over the 25-year asset life. The network ...

Presently, as the world advances rapidly towards achieving net-zero emissions, lithium-ion battery (LIB) energy storage systems (ESS) have emerged as a critical component in the transition ...
