Recognising this need, Relithia Energy is pioneering the manufacture of advanced lithium-ion batteries specifically tailored for solar applications, delivering a transformative ...

The critical missing steps in the supply chain in Africa are the processing stage (Stage 3) which is an essential stage in the battery supply chain, and currently only takes place outside Africa; ...

This leads to a typical situation where mineral concentrate is exported; value is added outside Africa; and products using lithium-ion batteries are then imported. In this report, we will ...

Explore key lithium projects in Africa, highlighting opportunities and recent developments. Discover what the future holds for this vital sector. Read more!

Nigeria is attracting increasing international attention for its vast lithium reserves, a critical mineral in the global push for clean energy ...

The policy will eventually cut across the various lithium processing value chains to the production of lithium-ion batteries and possibly eventually electric vehicles.
