Take the Vulcan Project in Oslo West--this hybrid system combines solar thermal storage with phase-change materials, providing 150MW of baseload power during Norway's darkest months.

It means homes with solar energy storage systems can benefit from solar energy, enhancing self-reliance on renewable energy and decreasing reliance on traditional electricity grids.

The Northern Lights CCS project off the coast of Norway, which will begin operation by 2024, has enough storage for the equivalent of 750,000 car emissions every year in the first ...
