How much does a solar module cost in 2025?

Specifically, in August 2025, the Price Index showed: about EUR0.055/Wp for low-cost photovoltaic modules, unchanged from July prices. "Manufacturers are moving quickly to end the devastating price war. The Chinese government is gradually phasing out tax incentives and subsidized solar module exports.

How much does a low-cost photovoltaic module cost?

Low-Cost Photovoltaic Modules: Average price of EUR0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

How much does a resale solar module cost?

For example, N-Type modules by REC listed for resale in May and July pushed up weighted average prices to \$0.411 and \$0.460 respectively. P-Type modules in September increased to \$0.311 as modules by Sirius PV, Solar4America, and Panasonic were remarketed. The same price increase was present in P-Type Bifacials for the month of December.

How much do low-cost solar panels cost?

Low-Cost Modules: Average price of EUR0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector. "Things are not going well for the PV industry right now," Schachinger notes.

The prices of crystalline silicon solar panels have consistently decreased, owing to technological advancements and increased ...

Key Market Driver: Falling prices for silicon wafers are giving installations a real boost--cost per watt has dropped by around 12% in recent deployments, making solar setups ...

Accurate, trusted price assessments for solar panel components is more vital than ever before. From upstream polysilicon, wafers and cells, to downstream panel prices, OPIS Global Solar ...

These manufacturing cost analyses focus on specific PV and energy storage technologies--including crystalline silicon, cadmium ...
