Workers check battery storage pods at a lithium-ion battery storage energy facility in Arizona last year. Ottawa is looking at regulatory changes around these types of facilities.

The Canada Photovoltaic Energy Storage Charging Pile Market is expected to witness sustained global growth driven by innovation, digitization, and emerging economy participation.

With this rapid transition comes an essential need: reliable and scalable EV charging infrastructure. Central to this development is the role of the EV charger pile OEM ...

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System ("BESS") is the fastest emerging ...

The two BESS projects represent a potential investment of approximately \$1 billion in clean energy technology in the Ottawa-area, ...

BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high ...
