This paper presents enhanced design for Automation control of processes involved in a solar system which utilizes programmable logic controller to automate tracking system for ...

We typically recommend using a dedicated hardware PLC like the GE, Ovation or Allen-Bradley when an RTAC doesn't completely fill the advanced control requirements, or when you need ...

The target of this project was to establish a solar tracking system with programmable logic controller as its controlling unit. More specifically this project concerned the programming of ...

The SolaX Gateway ECC-PLC is a cutting-edge solution for capturing and conveying solar PV production and energy consumption data via RS485 to the Energy Control Center (ECC). It ...

Made by solar engineers

The AC500 PLC uses high-precision solar algorithms to ensure that all type of trackers, for either PV, CPV or CSP, are precisely aligned and follow the movement of the sun with exceptional ...
