---

Shell (Shanghai) and Chongqing-based QingAn Energy Storage (QAES) have announced a strategic partnership to introduce immersion-cooling technology - a method long ...

We explore the emerging field of immersion cooling for energy storage cells, focusing on the unique thermal management requirements that distinguish these systems from ...

At CES 2026, Taiwan-based company XING Mobility announced the launch of the world's first immersion-cooled 800V high-voltage DC backup battery system (BBx800), ...

It uses dielectric immersion cooling for superior fire resistance, extended lifespan, and enhanced grid flexibility. Designed for outdoor deployment, it supports the demanding energy needs of ...

XING Mobility and PEWC jointly developed a hybrid energy storage system combining two distinct battery chemistries to serve large-scale energy applications. ...

"Immersion-cooled BESS provides all the traditional advantages of battery storage, resilient power backup, peak shaving and grid support, but its thermal efficiency could reshape ...
