Earlier this year, New York state released a roadmap to deploy 4.7 GW of additional energy storage projects by 2030. The Empire State is seeking 3 GW of "bulk ...

Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. Batteries are one of the most common forms of electrical energy storage.

Obtain a review of solar, storage, and other DER generation projects in New York State that received funding through NYSERDA. This dataset also includes detailed information each of ...

Unlike e-bike batteries, energy storage systems are equipped with sensors that track battery temperatures and enable storage facilities to turn off batteries if they get too hot or too cold.

NYPA is the largest state public power utility in the country. Thanks largely to NYPA's three large-scale hydroelectric plants, New York State is able to produce a substantial portion of statewide ...

Brooklyn Paper recently toured MGN's 5MW / 20MWh energy storage facility on Grand Street in Williamsburg to get a closer look at how the first-of-its-kind site helps ease the ...
