This approach is intended to allow any input parameter in the model to be varied by up to a factor of two (up or down) to assess its impact on cost. ...

Featuring a case study on the application of a photovoltaic charging and storage system in Southern Taiwan Science Park located in Kaohsiung, Taiwan, the article illustrates ...

Based on the electricity load of different types of buildings and the data of electric vehicle charging stations in Beijing, this paper analyzes the economic and environmental ...

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are ...

This approach is intended to allow any input parameter in the model to be varied by up to a factor of two (up or down) to assess its impact on cost. All costs reported are represented two ways: ...

To address this issue, a novel dynamic demand response pricing strategy in a grid-renewable generation integrated charging station environment is proposed in this paper. ...
