Eni's research is developing a thermal storage system called thermocline, consisting of a steel tank filled with concrete slabs used to store energy as heat. The concrete is heated by a hot ...

Imagine if your local supermarket could store a week's worth of renewable energy using the space beneath its parking lot. That's the scalability we're achieving through compressed air innovations.

The Danish developer intends to deploy a 117 MWh energy storage unit with lithium-iron-phosphate (LFP) batteries, within a year. It valued the project at over EUR 16.6 ...

This industrial park's 20MW/80MWh battery system isn't just keeping the lights on; it's rewriting the rules of commercial energy management. Think of it as a giant power bank for ...

Romanian transmission system operator Transelectrica has announced a tender for a battery energy storage project with a 35MW power output and 70 MWh storage capacity. [pdf]
