What are containerized generator / packaged container and enclosure options?

Containerized generator /Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets,balance of plant equipment,and switchgear.

Why should you choose genset containers?

With our genset containers offer optimal performance in various site conditions. By maintaining high-quality standards for both the engine and the complete containerized power plant package,we ensure excellent reliability for your power and heat generation needs. Easy to install and disassemble,convenient for maintenance and inspection.

Why do you need a containerized generator enclosure?

Our containerized generator enclosures offer unparalleled flexibility,durability,and convenience,making them the ideal choice for various industries and applications. Read on to discover why BMarko Structures is your go-to partner for all your containerized generator enclosure needs. Fill Out Our Contact Form Below To Get Started!

What is a twin power container?

The Twin Power container solution is a container that combines two engine/alternator assemblies with/without CHP in a 40ft container,making it perfect for applications that require variable or continuous power. Because you have two generators on a single platform,you have the flexibility you need to meet a 100% load or even a smaller load.

We design and build container generator units, shipping container power units, and modular generator housing that meet the highest standards of safety and performance.
