Saudi Arabia's Red Sea Project is making waves with the world's largest photovoltaic-energy storage microgrid. It's not just big - it's colossal! At the heart of this green ...

Featuring a 400MW solar PV system coupled with a 1.3GWh energy storage system, this ambitious project is set to revolutionize ...

Saudi Arabia and the United Arab Emirates are taking advantage of falling prices to load up on Chinese-made battery energy storage systems, so they can boost their renewable ...

Featuring a 400MW solar PV system coupled with a 1.3GWh energy storage system, this ambitious project is set to revolutionize sustainable energy solutions in hospitality. ...

Two Huawei technicians inspecting equipment during the construction of Saudi Arabia's Red Sea Project in the first half of 2023. Red Sea is the world's largest microgrid energy storage project, ...

In Africa, the pressing need for stable electricity makes solar power a necessity. The continent's abundant solar resources allow for a transition from traditional to solar-powered grids.
