The following clean technology programs do not offer incentives but may help customers save on their bills. Your contractor will also be able to help you understand which program is right for you.

The CPUC's Self-Generation Incentive Program (SGIP) offers rebates for installing energy storage technology at both residential and non-residential facilities.

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly ...

Eligible customers who install storage and solar systems through the program can benefit from lower energy bills, backup power during outages, and provide enhanced support for grid ...

As renewable energy becomes the backbone of modern power systems, photovoltaic (PV) energy storage projects are gaining momentum worldwide. Government subsidies play a pivotal role ...

Net Metering, Net Billing, and Other Solar Buyback Programs
Solar Renewable Energy Certificates-They're Disappearing Fast
Performance-Based Incentives: Electricity Over Environment
While SRECs represent the environmental attributes of solar energy, PBI programs focus on the electricity generation itself. In performance-based incentive (PBI) programs, you'll earn money per kilowatt-hour your system produces. You might earn payments monthly, annually, or at some other interval. And they can exist instead of or alongside net met...
