A new, large scale iron-sodium energy storage system will be manufactured in the US, helping to support more wind and solar in the grid.

Under the agreement, Peak will deliver 720 MWh of storage in 2027 - the largest single sodium-ion battery deployment announced so far. The deal also includes an option for ...

Aqueous sodium-ion batteries show promise for large-scale energy storage, yet face challenges due to water decomposition, limiting their energy density and lifespan.

Peak Energy announced on Friday the successful deployment and operation of the first grid-scale sodium-ion battery system in the US. First unveiled in July, Peak Energy's ...

SIBs have emerged as a promising candidate for large-scale energy storage systems (ESS), particularly in supporting intermittent renewable energy sources such as wind ...

The first phase of the world's largest sodium-ion battery energy storage system (BESS), in China, has come online.
