---

There are two main types of 12V solar charge controllers: PWM and MPPT. PWM controllers are more cost-effective and simpler, while MPPT controllers are more efficient and ...

Buy the right charge controller for solar panel systems. Maximize energy efficiency & protect your battery investment ...

The solar controller not only extends battery life and improves system performance, but also has multiple protection functions: Battery under-voltage, over-voltage, output overload, short ...

Choose from our selection of 12 volt solar charge controllers that improve efficiency & include extensive safety protections.

Buy the right charge controller for solar panel systems. Maximize energy efficiency & protect your battery investment with our reliable MPPT & PWM controllers.

It's engineered for solar applications requiring both robust 20-amp charging performance and comprehensive load protection. Maximum 12V Power: Delivers 20 amps of constant voltage ...
