To support automotive battery development tasks, we have created the AVL Battery Test Systems. These "plug-and-play" solutions are free-standing or containerized battery testbeds ...

Affordable EV battery testing for performance, durability & safety to meet the latest standards. Learn more about precision electrical instruments.

Uses local climate data, your roof measurements, current local electric rates and current solar system cost to generate an accurate solar cost and savings estimate, customized for your home.

Battery Energy Storage Systems (BESS) store surplus energy from solar, wind, and the grid. However, because they involve high-voltage lithium-ion batteries in large volumes, ...

This 4 MW lithium-ion project began operation in September 2015 and is paired with a 2 MW solar installation. The installation provides two primary functions: 1) backup power and micro-grid ...

BESS: A stationary energy storage system using battery technology. The focus of the database is on lithium ion technologies, but other battery ...
