Does a 4G solar security camera need wifi?

No WiFi Network Needed One of the greatest things about the 4G solar security camera is that it is independent from WiFi network, and still, it transmits videos wirelessly with no wire at all. So the 4G solar security camera is ideal to use as long as the area has good 3G and 4G coverage, no matter how remotely your property is located.

How much does a 4G solar security camera cost?

Usually the 4G solar security camera comes with an SIM card slot and you need to purchase the card separately. And the cost is all determined by the mobile service provider and the data plan you choose, anywhere from \$4.99 to over \$100 for an unlimited plan.

How does a 4G wireless solar security camera work?

And the 4G wireless solar security camera is typically battery powered and works with an add-on solar panel. That way, you don't need to visit the remote sites to recharge the battery frequently.

Are 4G solar security cameras good for off-grid location monitoring?

Now 4G solar security cameras come as a tailor-made handy solution for you. Widely used in the remote cabin, construction sites, boats, barns, the second home, and etc., the 4G solar security camera is a popular choice for off-grid location monitoring.
