Why did Meyer Burger stop producing solar modules?

Meyer Burger Technology AG is forced to stop its solar module production in the U.S., which is still ramping up, due to a lack of funds. Today (May 29, 2025), all 282 remaining employees at the Goodyear, AZ, site received their notices of termination. Production with an annual capacity of 1.4 gigawatts was shut down immediately.

Is the solar panel industry undergoing rapid consolidation?

The solar panel industry is undergoing rapid consolidation. Large-scale manufacturers with deep vertical integration and supply chain control are thriving, while legacy electronics firms like Panasonic are increasingly squeezed out.

How many GW of solar Watts did a solar company reduce?

In total, the Arizona-based solar maker reduced its full-year volumes sold guidance to about 14.4 gigawatts, a 1.2 GW reduction from its last projection. How companies across the country are managing increased operational and supply costs to remain competitive.

Is Panasonic leaving solar and battery storage?

Panasonic, once a household name in the solar panel and energy storage space, has officially exited the solar and battery storage market after decades of involvement.
