Xindun power factory sales inverter 48v to 220v, 48v to 240v, 48vdc to 230vac. AC inverters high frequency design, high power density, high efficiency, low no-load loss.

Circuit DescriptionSetting Up The Oscillator FrequencyUsing Zener Diode to Drop Regulate The IC Supply VoltageReferring to the shown 48V inverter circuit, the IC 4047 forms the main oscillator stage responsible of producing a totem pole outputs for the connected output stage. The output stage is made by configuring a 4 individual high gain high power transistors modules, two of them on each channel of the push pull output stage.
