Why is Tokyo expanding its EV infrastructure with citywide battery swapping?

For electrification to work at scale, energy solutions must be fast, reliable, and space-efficient. That's why Tokyo is expanding its EV infrastructure with citywide battery swapping.

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

Does Japan have a capex subsidy scheme for grid-scale battery developers?

Increased generation of renewables requires various forms of energy storage to manage the issues associated with intermittency. Japan has, therefore, introduced two CAPEX subsidy schemes for grid-scale battery developers, excluding co-located projects.

Why is Sumitomo launching a large-scale energy storage platform?

One of the main reasons is the insufficient capacity of transmission lines. In response to this issue, Sumitomo Corporation aims to expand its business of storing energy nationwide in Japan by developing a large-scale energy storage platform that can compensate for this lack of transmission line capacity.

V2G enables electric vehicles (EVs) to not only draw electricity from the grid but also feed power back during peak demand or power outages--turning EVs into mobile energy storage units ...

The auction is designed to promote investment in large-scale power generation projects for decarbonisation with a procurement target of 1 GW per annum across BESS and ...

Two projects, one being developed by NTT Anode Energy and another by Renewable Japan, were awarded the maximum 2 billion. Five others secured about a billion ...

Here, we will delve into our path taken to launch a completely new business and start operation of the first large-scale energy storage facility in Japan ...

ITOCHU has developed a product lineup that meets market needs, from home storage batteries to large-scale energy storage systems for industrial and grid use.
