What is a Mitsubishi Electric uninterruptible power supply (UPS) system?

Mitsubishi Electric uninterruptible power supply (UPS) systems provide daily power conditioning as well as backup power in the event of an outage to reduce damage to manufacturing equipment and maintain uptime for your production line.

Why do you need an uninterruptible power supply system?

Uninterruptible power supply systems can reduce downtime (and its cost) in manufacturing by providing reliable backup power in an emergency. A UPS allows your systems to shut down slowly, in alignment with standard procedures, as opposed to the rapid shutoff of an outage, which could damage the equipment.

Why should you use a Mitsubishi Electric ups?

A UPS can support power quality and backup requirements across a number of manufacturing industries, eliminating damaging spikes and dips, providing increased uptime, and allowing for a controlled shut off in the event of power loss. Leverage Mitsubishi Electric UPS as power conditioner and backup power system to reduce downtime in manufacturing.

What is MTU uninterruptible power supply?

Whether for food processing, chemical, textile or other critical manufacturing processes, mtu distributed energy solutions including uninterruptible power supply are aimed at maximizing uptime.

With industrial power supply solutions ranging from generator sets to battery storage to dynamic uninterruptible power supplies, we offer the broadest range of solutions, all from a single source.

African Energy is a specialized distributor of solar electric and power back-up equipment exclusively for the African market. For twelve years, we have concentrated on serving the ...
