Could hidden communications equipment be found in Chinese-manufactured solar energy parts? That has created a vulnerability that suddenly feels more real, as Reuters is reporting that experts have discovered hidden communications equipment in various Chinese-manufactured solar energy parts.

Are Chinese-made solar inverters a supply-chain vulnerability? Leading renewable energy operators worldwide are confronting a disturbing supply-chain vulnerability: undocumented communication modules found in Chinese-made solar inverters and batteries.

Does China have a grip on energy infrastructure? NATO added that China's grip on energy infrastructure is deepening. "We must identify strategic dependencies and take steps to reduce them," a NATO official said. With critical infrastructure at stake, governments are being pushed to act before the risk escalates further.

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

Experts have warned that communication devices could evade firewalls and switch inverters off remotely, posing a huge risk to ...

Recent revelations concerning Chinese-manufactured solar power inverters have raised significant security concerns following the discovery of potentially harmful ...

That has created a vulnerability that suddenly feels more real, as Reuters is reporting that experts have discovered hidden ...

US energy officials are reassessing the security risks posed by Chinese-made power inverters and batteries--key components in renewable energy infrastructure--following ...
