How many power plants are there in Togo?

Currently, seven power plants are operated with fossil fuels in Togo with a cumulated capacity of ~260 MW. These so-called thermal power plants use thermal gas, thermal oil and thermal DDO to produce electrical energy. Most of the power plants of this type are managed by the grid operator and utility CEET.

Who manages the power plants in Togo?

Most of the power plants of this type are managed by the grid operator and utility CEET. The largest two run by CEET are located in the capital Lomé; and have a capacity of 12MW each. The largest thermal power plant in Togo is operated by Contour Global, a private company and has a capacity of 100 MW.

How much electricity does Togo need?

A total of 4 million inhabitants in Togo still must be supplied with electricity. Currently, an electrical power of 230,000 kW is produced in the country. It is estimated that in 2030 a total of 100,800,000 kW of electricity will have to be produced to supply the entire population with electricity.

How does regional electricity trading affect Benin and Togo?

Electricity is imported from Nigeria and Ghana via the CEB interconnectors, with the remainder being supplied by the Contour Global power plant and other smaller domestic sources. Nevertheless, regional electricity trading has a positive impact on the energy sector and economy of Benin and Togo.
