How to Choose the Right Energy Storage System for Syrians? Given the poor grid conditions, the ideal power solution for Syrian households and ...

An analysis of Syria's energy resources and infrastructure, and outlook on the future of Syrian energy production and trade.

In 2010 oil accounted for about a quarter of Syria's income, estimated as \$3.2bn for 2010, and almost all oil exports were to the EU. Production was 400,000 barrels per day (64,000 m /d) in 2009 and exports about 150,000 barrels per day (24,000 m /d), mainly Germany, Italy and France. According to BBC oil reserves were 2.5bn barrels in 2010. During the civil war before the fall of Assad the co...

In the short to medium term, it should support energy generation in Syria, especially in renewable electricity. In the longer term, ...

Well, there you have it - Syria's energy future isn't about choosing between survival and sustainability. With smart storage solutions, it can achieve both simultaneously.

In the short to medium term, it should support energy generation in Syria, especially in renewable electricity. In the longer term, it should offer Syria a role in an interconnected ...
