Are telecommunications companies selling their towers to dedicated tower companies?

Major telecommunications firms, such as AT&T, Verizon, and T-Mobile, not only provide mobile services but also own and operate numerous towers. However, the telecom landscape has witnessed a significant trend where these operators increasingly sell their towers to dedicated tower companies to focus on their core business of service delivery.

What is a wireless telephone base station?

A wireless telephone base station communicates with a mobile or hand-held phone. For example, in a wireless telephone system, the signals from one or more mobile telephones in an area are received at a nearby base station, which then connects the call to the land-line network.

What is a base station in radio communications?

In radio communications, a base station is a wireless communications station installed at a fixed location and used to communicate as part of one of the following: a wireless telephone system such as cellular CDMA or GSM cell site. Base stations use RF power amplifiers (radio-frequency power amplifiers) to transmit and receive signals.
