The New York Power Authority's draft strategic plan for ...

Our project marks the first use of direct wind energy storage technology in the United States. Energy storage is key to expanding the use of renewable energy.

Solar and wind power are planned to develop in tandem with battery storage so excess energy can be saved while nature provides ...

The proposed projects in the draft plan are located across the state and represent a variety of technologies, including solar, wind and battery energy storage systems (BESS):

Solar and wind power are planned to develop in tandem with battery storage so excess energy can be saved while nature provides wind or sun. Battery storage is meant to ...

The New York Power Authority's draft strategic plan for expanding the state's renewable energy resources proposes 40 projects representing 3.5 GW of capacity from solar, ...
