La station de base, également connue sous le nom de BTS (Base Transceiver Station), est un dispositif dans les systèmes de communication sans fil tels que le GSM.

We designed and built a defense scheme which detects and blacklists a fake base station and then, informed by the detection, avoids it through link routing for connectivity ...

May 25, 2023; The UPS power supply for base stations is an essential component of the entire communication power system. It is widely used in the communication industry due to its high ...

To address these issues, this article proposes a mathematical model for optimizing 5G base station coverage and introduces an innovative adaptive mutation genetic algorithm ...

In today's 5G era, the energy efficiency (EE) of cellular base stations is crucial for sustainable communication. Recognizing this, Mobile Network Operators are actively prioritizing EE for ...

Abstract The threat posed by false base stations remains pertinent across the 4G, 5G, and forthcoming 6G generations of mobile communication. In response, this paper introduces a ...
